

# UNIVERSAL CUTTER SHARPENER

It is the finest, top-of-the line, and most complete sharpener available... at a surprisingly low cost! It is used to grind the engraving cutters of various shapes, angles and diameters, and the relevant tracing stylus as well. There is a fine feed adjustment on the grinding spindle. When using square tool post supplied, it can also grind formed cutters for other machine tools so as to extend the range of applicability of the machine.

Order No. 101-1005  
Reg: \$ 1400.00  
**Sale: \$ 1135.00**
